Sergiy Savostin

FULL STACK DEVELOPER

Profile

I can call myself the "old guard" of software development, yet always open to change. I have years of practical experience with different technology. I keep improving my skills on a daily basis and learning new tricks "on-site" as I solve the problems of an ongoing successful business. I feel the pains of an IT business and at the same time understand know all ins and outs of software development. My motto is, 'Never say "I can't," rather "Give me some more time"'.

Employment History

CTO, WellDone Creative Software, London, UK / Kyiv, Ukraine (remotely)

2009 — PRESENT

12 years of successful technical management and hands-on software development at a small private company:

- Developing and managing corporate websites and web applications (PHP, MySQL, HTML, JavaScript, CSS, D3,js).
- Developing a Windows VPS hosting service, including a billing system and a management console (Proxmox, KVM, Powershell, PHP).
- Designing and managing a ~1 Tb statistical data service (MySQL, Clickhouse, PHP, D3.js, Node.js, API).
- Developing native libraries for the company's software products (C/C++, SQLite, OpenSSL).
- Integration of the company's products and apps with third-party services, platforms, and APIs: Stipe, PayPal, SMS gateway, mass mail / ticket system / CRM, MODx, SMF, Cloudflare, several APIs (JSON, XML/SOAP, REST).
